

# Heightening Accuracy of Charge Capture

---

# Introduction

# Background

## ◆ Penn Medicine Overview

A GROWING FOOTPRINT

# CLINICAL FACILITIES

Penn Medicine includes six acute-care hospitals and hundreds of outpatient locations throughout the region, as well as educational facilities at the Perelman School of Medicine.

**THE HOSPITAL OF THE UNIVERSITY OF PENNSYLVANIA**

is Penn Medicine's largest hospital. HUP is a busy inpatient hub for cancer, neurosciences, cardiac care, and many other specialties. It is also the oldest university-owned teaching hospital in the country.

**PENN PRESBYTERIAN MEDICAL CENTER**

is a renowned center for cardiac care and ophthalmology. Its campus includes the Musculoskeletal Center's outpatient facility at Penn Medicine University City and the Pavilion for Advanced Care, home to Penn Medicine's Level 1 Regional Resource Trauma Center.

The Hospital of the University of Pennsylvania and Penn Presbyterian Medical Center was named to the prestigious Honor Roll list by U.S. News & World Report

**PENNSYLVANIA HOSPITAL**

is the nation's first hospital, cofounded by Benjamin Franklin in 1751. Today its outstanding clinical programs include the Spine Center, the Center for Transfusion-Free Medicine, orthopaedics, maternity and newborn services, and behavioral health. The campus includes Penn Medicine Washington Square, the hospital's outpatient facility.

**CHESTER COUNTY HOSPITAL**

is a hospital campus in West Chester, specializing in heart and vascular care, cancer, and orthopaedics, with satellite locations in Exton, West Goshen, New Garden, Jennersville, Kennett Square, and West Grove.

**LANCASTER GENERAL HEALTH**

includes the Lancaster General Hospital, the Women & Babies Hospital, and a network of more than 60 outpatient facilities and physician practices in Lancaster, Chester, and Lebanon counties.

**PENN MEDICINE PRINCETON HEALTH**

joined Penn Medicine in 2018 and is among the most comprehensive healthcare systems in New Jersey, including facilities offering acute-care hospital services, behavioral healthcare, ambulatory surgery, and wellness services.

# Timeline

## Practices

- **2011** – Clinical Practices of University of Pennsylvania Practices went live on Professional Billing and Registration

## Hospitals

- **October 2016** – Pennsylvania Hospital and Chester County Hospital
- **March 2017** – Hospital of University of Pennsylvania and Presbyterian Medical Center
- **June 2018** – Princeton Medical Center
- *Continuous implementations including Cupid for Cardiology and Hall Mercer Behavioral Health*

# Challenges

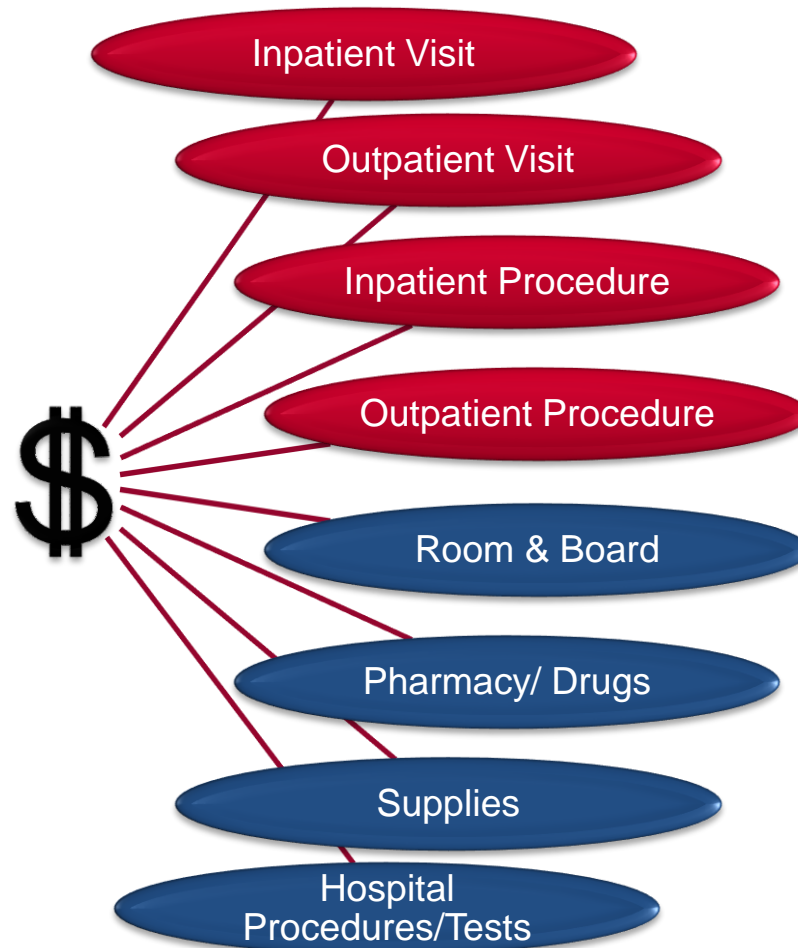

- ◆ “ Most healthcare executives say charge capture is essential, yet many do not have a revenue integrity routine - ”

<https://www.prnewswire.com/news-releases/78-of-healthcare-execs-say-charge-capture-is-essential-yet-40-discuss-it-once-a-month-or-less-300774051.htm>

# Challenges

- ♦ Variety of different types of charges to capture/reconcile:

# Background

- ◆ **In preparation for EHR conversion in October 2016, senior leadership used conversion as catalyst to develop revenue integrity department**
  - Hired internal program director to own chargemaster consolidation
  - Additional support would be needed to achieve revenue goals
- ◆ **Engaged consultants to mitigate revenue and cash disruption risk for below areas:**
  - Charge capture
  - Pre-bill management
  - Claims integrity
- ◆ **Developed future-state revenue integrity structure and stood up revenue reconciliation committees for each hospital entity**
  - Critical to the success of the conversion
  - Revenue integrity department established support model of the clinical areas to ensure sustainability

# 5 Lessons Learned in Revenue Integrity

"I can't remove this charge from our electronic billing, so will you agree to have the prenatal check up?"

CartoonStock.com

# 5 Lessons Learned in Revenue Integrity

## Lesson 1 – SCOPE

- Understand conversion scope and ensure staff can support conversion timelines

## Lesson 2 – LEADERSHIP SUPPORT

- Leverage corporate and entity leadership to message accountability and roles & expectations to department stakeholders

## Lesson 3 – DEPARTMENT BUY IN

- Connect with each clinical department to socialize the roadmap and identify key partnership opportunities

## Lesson 4 – TOOLS

- Define revenue integrity functions to support departments and eliminate revenue disruption

## Lesson 5 – KEY CENTRALIZED ROLES

- Assess the revenue integrity staff and create specific roles based on their skills

## **I. Understand conversion scope and ensure staff can support conversion timelines**

- ◆ **Penn Revenue Integrity had exhaustive list of conversion responsibilities**
  - Charge master consolidation and validation with operations/ finance
  - Charge capture design and education
  - Charging work-driver build (error resolution & charge entry)
  - Revenue reconciliation policy development
  - Reporting development and training
  - Metric benchmarking
- ◆ **Department had limited insight to current state and unclear scope of responsibilities**
- ◆ **Scope was limited to critical efforts to minimize revenue disruption**
- ◆ **Leveraged consultants to allow for prioritization and divide-and-conquer approach**

## II. Leverage corporate and entity leadership to message accountability and roles & expectations to department stakeholders

- ◆ **Defined best practice revenue reconciliation strategy in conjunction with executive leadership, where departments would be accountable**
  - Reporting capabilities and transparency through conversion supported decision
  - Penn seized opportunity for department management to own their own revenue
- ◆ **Historically, departments were not involved in revenue reconciliation or error resolution**
  - Financial discrepancies and shortages identified by finance at month-end
  - “Gatekeepers” followed up with departments about charging errors via email
  - New technology would provide tools for daily revenue reconciliation and ability to be self-sufficient in identifying errors
- ◆ **Leveraged executive suite to communicate shift in revenue ownership**
  - Designated hospital entity revenue leads
  - Anticipated resistance to change as clinical departments were in midst of technical conversion

*“They know their charges. They know their services. They know their patients. They are closest to their revenue and should be able to own it.”*

*– Penn entity CFO*

### III. Connect with each clinical department to socialize the roadmap and identify key partnership opportunities

- ◆ **Clinical departments' anxieties of revenue ownership expectations provided opportunity for revenue integrity to be change agents**
- ◆ **To engage departments, held revenue “speed-dating” sessions:**
  - *Does the planned charge master look correct?*
  - *How do you enter your charges today, and who is responsible for entering them?*
  - *Who reconciles charges?*
  - *How many charges do you typically enter on a Monday?*
  - *Who is losing sleep if revenue is below budget?*
- ◆ **Department meetings allowed revenue integrity to better understand department concerns, specific workflow needs, and individuals for targeted training**
- ◆ **Revenue integrity then prioritized core activities to support the departments and achieve organizational goals**

## IV. Define revenue integrity functions to support departments and eliminate revenue disruption

- ♦ **Fully integrated revenue integrity departments provide collaboration from point of care to the back-end revenue cycle functions**
- ♦ **To support department concerns, the RI department addressed them as follows:**

Department Concern	Revenue Integrity Response
Lack of a visual picture of charging workflows	Demonstrated charging workflows for department validation and customized training classes for charging clerks
Misalignment between charging menus relative to department needs	Customized charging menus for departments to facilitate efficient and comprehensive charge capture
Incomplete and outdated charge master	Creation of new charge master codes to fulfill department charging and billing needs
Anxiety over becoming a "revenue reconciliation owner"	Introduced policies and procedures governing future state revenue reconciliation.  Customized training courses by service line to review reports departments would use for reconciliation, and assist in tailoring one-stop shop reporting dashboards to each director's needs
Lack of knowledge of historical revenue performance	Educated departments on historic revenue trending and revenue targets post-conversion

# IV. Define revenue integrity functions to support departments and eliminate revenue disruption

## My Dashboards

### UPHS Revenue Reconciliation Dashboard - Personal ▾

#### Occupancy

#### Toolkit

The following describes the step by step reconciliation process and provides links to the key reports needed. The "UPHS Revenue Manager Tips and Tricks" contains supplemental training documentation outlining how to configure these different reports to meet your department's reconciliation needs.

##### Charges Posted Yesterday

###### ✓ Step 1:

###### ----- Daily HB Revenue Tracker -----

Provides comparison of daily posted hospital charges to the historical baselines.

###### ----- Daily PB Rev Tracker -----

Provides comparison of daily posted physician charges to the historical baselines.

###### ✓ Step 2:

###### ----- Revenue and Usage Report (HB) -----

You can run this report for your cost center to review all posted HB charges over a specified time frame (up to 30 days).

###### ✓ Step 3:

###### ----- Workqueue List -----

Workqueues ensure that charges have the necessary information attached so they can be successfully filed to HB or PB.

###### ----- Visit Report -----

Run this report for your departments to see the visit volume associated with the charge posting period.

## IV. Define revenue integrity functions to support departments and eliminate revenue disruption

- ◆ The Revenue Tracking Tool compares revenue posted in Epic to benchmark revenue posted in the legacy system to assist in revenue stabilization
  - Tracked daily
  - Adjusts expected revenue to account for volume fluctuations
  - Highlights areas (Red, Yellow, Green) based on thresholds to identify areas requiring additional attention
    - Will review areas posting revenue below and above thresholds

Summary Report Detail

## IV. Define revenue integrity functions to support departments and eliminate revenue disruption

Department specific charge review workqueues that check the following:

Charge Review WQ	Rule	Error vs. Warning
High dollar charges	Over \$10,000/unit (all departments) or \$1,000/unit (pharmacy)	Warning
High quantity	Over 100 (all departments)	Warning
Service Date out of Range	Charge service date is before admission date or after discharge date	Error

### Role of Revenue Owner

- Monitor and access assigned workqueues and review charges
- Follow up with charge entry users as necessary to attain clarification on charges
- Update charge records as needed and resubmit the charges within the workqueues

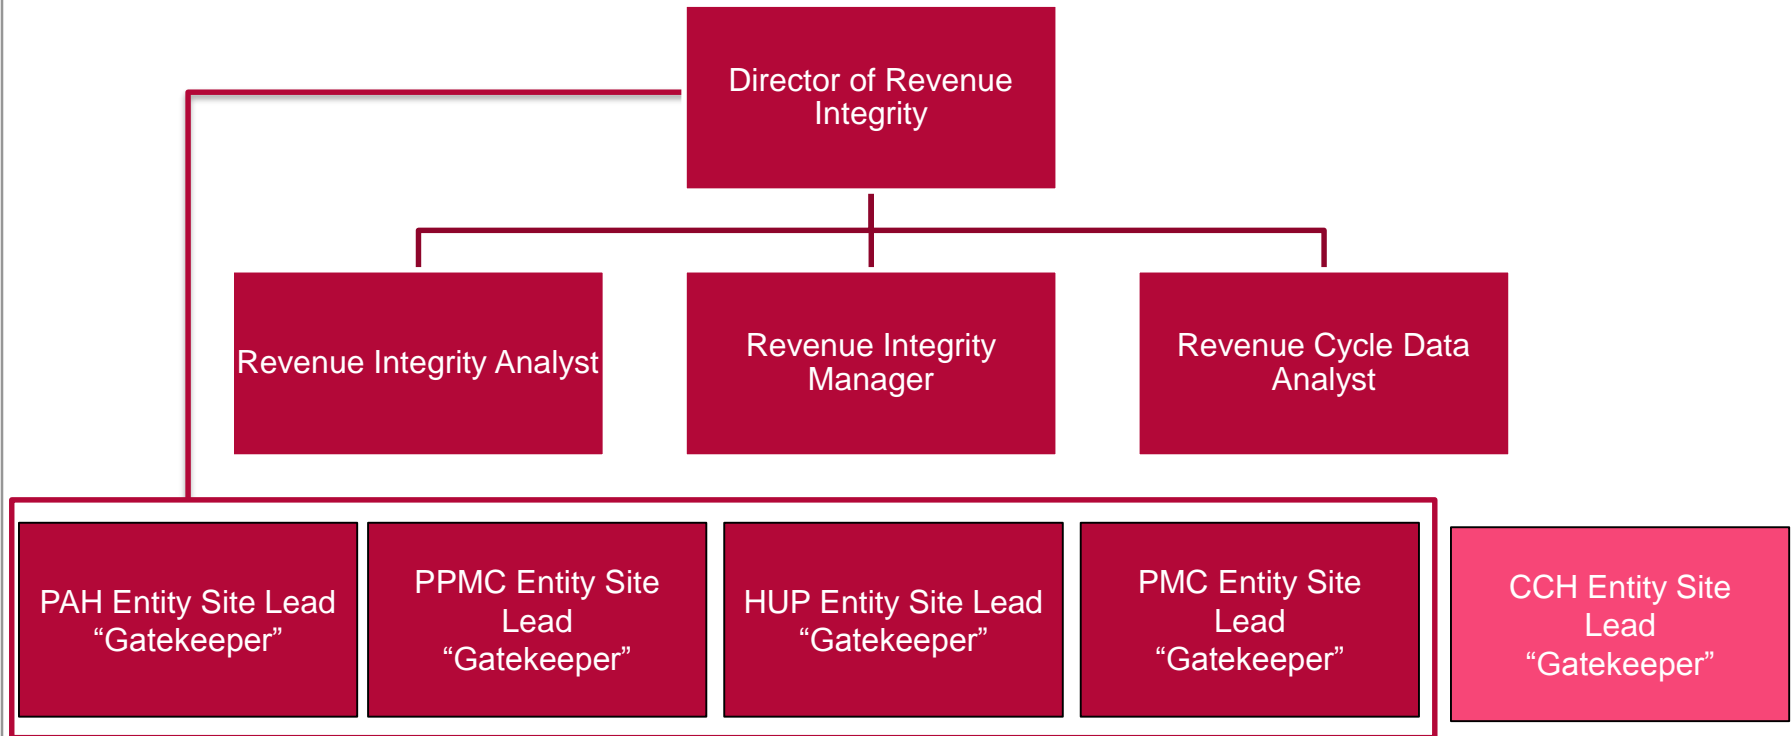

## V. Assess the revenue integrity staff and create specific roles based on their skills

- ◆ **Six months of conversion preparation and two months of conversion chaos control positively impacted departments' confidence to own revenue**
  - Allowed leadership to assess skill sets of revenue integrity department personnel and others that could aid in building best practice revenue integrity department
- ◆ **Created specific revenue integrity roles and job descriptions based on skill sets of individuals that supported clinical departments through conversion**

Position	Description
Charge capture manager	Supports charging workflows for departments and coordinates system build updates with system analysts
Revenue integrity analyst	Provides financial analysis of revenue discrepancies and maintains a revenue tracker to provide transparency throughout the organization
Site liaisons	Based at each entity, working with appropriate personnel to identify and resolve common charging errors that prevent billing
Entity leads	Exist for each hospital, holding clinical departments accountable for revenue reconciliation expectations and acting as an escalation point
